

SPEC SHEET

A closer look at the Bezier

A sweeping asymmetrical curve and aromatic western red cedar give the Bezier its sculptural character. A quiet place for heat, steam, and time together.

DESIGN & CONSTRUCTION

CROSS-LAMINATED TIMBER (CLT) FOR STEADY WARMTH

Timber layers bonded crosswise form vertical walls that hold heat and release it slowly for steady warmth.

A CURVED ROOFLINE THAT GUIDES STEAM

The sweeping curve guides steam in a thermal roll, creating soft, enveloping warmth around the body.

WESTERN RED CEDAR FOR COMFORT AND SCENT

Clear-grade cedar benches from Vancouver Island feel soft on bare skin, with a gentle scent as they warm.

EXTERIOR CLADDING THAT AGES BEAUTIFULLY

Cladding options are built for 20+ years outdoors, weathering naturally without chemical preservatives.

Illustrative model views, not to scale. Final dimensions and variant details to be confirmed.

Heater & control

The Bezier Eight pairs the IKI Pillar 9 kW heater with HUUM UKU Wi-Fi control.

IKI Pillar

9 kW / MADE IN FINLAND

An open stainless-steel mesh holds a tall column of stones for steady, even heat.

PAIRED WI-FI CONTROL

HUUM UKU Wi-Fi

Adjust the heat with a single dial. Start or schedule from your phone.
